In WebVist I am responsible for the development of customer tailored websites, mainly in **Wordpress**. The websites I have created were user friendly and conforming strictest web design standards. Content can be easily edited by the client thanks to **Advanced Custom fields**.

My main responsibilities are:

- Making fully responsive, **SEO** friendly, modern wordpress websites from scratch or PSD for different niches(car rental, interior finish, eco organisations, medicine, shops, etc)
- Creating fully responsive, modern, **email templates**
- Making **landing pages**
- Developing and/or editing ecommerce sites on **Woocommerce**
- Extending existing websites with new modules
- Upgrading old existing websites by making them accessible from **mobile devices**
- Pages Optimisation in the area of:
 - SEO - changing **headers hierarchy**, increasing **internal linking**, using valid, **semantic HTML**, adding **Structured Data**, setting proper titles, descriptions and metadata.
 - Speed - reducing **HTTPs requests**, reducing images size, **minification of files**, setting **cache** control
 - Security and accesibility - migrating from **HTTP to HTTPS**

Bootstrap, Zurb Foundation

I can use any css framework. I used Zurb fundation for emails to make couple email templates for big smartphone reseler.

Wordpress

I can make full Wordpress websites from scratch for companies, blogs, news portals, eCommerce. I can use current themes, change them or make new one. I know file structure and how to make **child themes**. I'm familiar with wordpress loops, functions, filters, shortcodes, and many useful plugins including **Advanced Custom fields** and **Woocommerce**.

SQL, MySQL

I know SQL syntax, I know how to administrate, make backups, export, import database, create users and setup privileges.

TOOLS & WORKFLOW

Git

Basic git knowledge.

Npm

I use Npm to automate my routine tasks and make development faster and easier.

Console

I'm familiar with bash and batch scripting. Most often I'm using git, npm comands and some ssh utilities.

Linux

I know how to install and setup Linux for standard usage. I know how to install packages, use comand line. I can setup Apache server, samba server.

ADDITIONAL SKILLS

SEO & optimisation

I know how to: set redirects, cache elements, move website from http to https, set cloudflare. I know how important is content and used keywords, heading hierarchy, structural data, og metadata.

UI & UX

Good knowledge of how to use white space, elements hierarchy, good application of colors. I value rule content over special effects.
